## September 2017

### CVM Fall Celebration, Friday, Sept. 22nd

Please join the CVM Fall Festival on Friday, September 22, from 3:00-5:00 in the Atrium to kickoff the new academic year and celebrate the opening of our new building! There will be ice cream, other refreshments, prizes, and fun for all.

### New York State Veterinary Conference

The NYS Veterinary Conference will be held at CVM October 6-8. This year's theme is "Implementation: Knowledge For Your Career. Information For Your Life." It is packed with practical and life changing sessions. To learn more and register [CLICK HERE](#)

### Drs. Wagner and Weiss Receive New Appointments

Dr. Bettina Wagner was appointed as the next Chair of the Department of Population Medicine, and Dr. Robert Weiss was appointed the new Associate Dean for Research & Graduate Education. [READ MORE](#)

### CVM Welcomes New Students

We're excited to welcome new students to the College, including an expanded class of 120 DVM students, 25 new BBS students, 7 MPS students, and the inaugural class of 15 MPH students.

## Dean Warnick Announces New Appointments

I am pleased to announce that Dr. Bettina Wagner will be appointed as the Chair of the Department of Population Medicine and Diagnostic Sciences, effective December 1, 2017. Dr. Wagner received her veterinary degree in 1990 and her PhD from the School of Veterinary Medicine in Hannover Germany. She has been a member of the College of Veterinary Medicine faculty since 2004 and has served as Associate Dean for Research and Graduate Education since 2014. In addition to administrative responsibilities, she conducts research in equine immunology, equine herpes virus infections and Lyme

disease. She has led the Serology Section in the Animal Health Diagnostic Center since 2006. I appreciate Dr. Wagner's capable leadership of the Research and Graduate Education office for these past three years. Her broad experience as a faculty member, involvement in diagnostic service and basic and applied research and work in college leadership puts her in an excellent position to serve as Chair. I am confident she will be successful in this role. I thank Dr. Craig Altier for his service as Department Chair since 2012. He has done a terrific job as Chair and will now be returning to full time faculty activities including his research program in Salmonella pathogenicity and host interactions. I also want to thank the search committee and all those who participated in filling this important position.

It is also my pleasure to announce that I am appointing Dr. Robert Weiss as our next Associate Dean for Research and Graduate Education, effective October 1, 2017. Dr. Weiss is a Professor in the Department of Biomedical Sciences and conducts research using mouse models to study how genomic instability and metabolic dysfunction affect mammalian development and tumorigenesis. He received his PhD in Molecular Virology from Baylor College of Medicine in 1997, trained as a postdoctoral fellow at Harvard Medical School, and joined the Cornell faculty in 2002. Having served on key college and university research committees and in graduate field leadership roles, in addition to his own graduate student advising, Dr. Weiss brings a wealth of experience to the position of Associate Dean. He also is Director of the Comparative Cancer Biology Program at the College and recognized for his work in fostering communication between cancer patients and researchers in the community through the Cancer Resource Center. I am very appreciative of Bob's willingness to take on the role of Associate Dean and look forward to the expertise and perspective he will bring to this critical position in the college.

Lorin D. Warnick, DVM, Ph

*Austin O. Hooley Dean of Veterinary Medicine*

## CVM Welcomes New Students

We're excited to welcome new students to the College, including an expanded class of 120 DVM students, 25 new BBS students, 7 MPS students, and the inaugural class of 15 MPH students.

### DVM

Our new DVM class is comprised of 66 New York State residents and 54 non-New York State residents, 23 underrepresented minority (URM) students, and 17 Cornell graduates.

### BBS

Our new BBS students are made up of 19 PhD students, 3 combined degree students (DVM-PhD) and 3 DVMs seeking PhDs, with 35% being URMs.

### MPS

The MPS program, which allows students to specialize in veterinary parasitology, is now greeting its second group of new scholars—a group of women hailing from previous universities such as Cornell, Ohio State, and SUNY Oneonta.

## MPH

Finally, congratulations to our first class of MPH students! This group of 15 are a diverse group, including both international students and those from upstate NY, with backgrounds in dentistry, vet pathology, food science, and mathematics - to name a few.

Welcome to all our new students! Don't hesitate to reach out to College faculty and staff with your ideas, questions, and concerns!

## A day of data and insight

Like 78

Tweet

G+

Share

2

Every year, the Biological and Biomedical Sciences (BBS) Symposium takes place on the Friday before classes officially start. And each year, different fields within the College of Veterinary Medicine take turns organizing and hosting the event. This year, the Department of Population Medicine hosted the event, choosing the overarching theme of “Medical Frontiers: Turning Data into Insight.”

The theme was first introduced to the audience by Dr. Renata Ivanek, a faculty presenter. Ivanek stated, “Data is only valuable if we can translate it into usable insight,” setting the theme for the remainder of the symposium.

### An effective avenue for growth

Barnard presents her research

Each year, students present their research using posters and oral presentations. Karen Barnard, a fourth-year graduate student from the Parrish lab, was one of the invited student speakers and spoke about viral tropism. Barnard fondly remembers her first symposium as a first year and used the symposium as a marker of the progress she’s made throughout her graduate career: first being an incoming student and using the day to learn more about Cornell, then presenting posters and using that day to trade ideas with her peers, and then this year, giving an oral presentation. She also emphasizes that the symposium is a critical venue for first-year graduate students because it “gives them a chance to see what research is done within the program and a chance to talk to the graduate students, which really gives them a sense of what the BBS program is composed of.”

Robert López-Astacio, a first-year graduate student, agreed with Barnard. “Each current graduate student helped me narrow down options for each rotation,” says López-Astacio. “The talks opened my mind to new areas of research/topics, and the symposium did an excellent job bringing together the fascinating branches of the program.”

### The intersection of humans, technology, and health

The event culminated with the Keynote Speaker, Dr. Theresa Bernardo from the University of Guelph in Canada. Bernardo spoke

about the increasing “connectedness of the world” and how this is impacting progress with a Data into Insights theme in mind and a One Health perspective. She reminded the audience of how technology has made the world smaller, and how seemingly minuscule changes have the largest impact on society. She explained how there are currently 8 billion people in the world, of those 8 billion, only 4.5 billion having access to sanitary and working toilets—but 6 billion having access to cellular phones. This accessibility to phones contributes to the increase of “citizen science” and to the progress of health, with technology aiding in combatting infectious disease and gaining insights into the natural world.

Bernardo highlighted how technology is the newest frontier for medicine. For example, the accessibility of cellphones has played a role in many epidemics, including the Ebola outbreak of 2015 by reporting real-time local outbreaks to medical aide professionals. She reminded the audience of the privilege to have a cellphone and encouraged audience members to consider incorporating technology into their own research. Dr. Rachel Jennings, a member of the planning committee, hopes that the talk would encourage audience members by “stimulating the innovation needed to tackle today’s emerging problems. It is easy to become consumed by your own research and lose awareness of what other people doing especially those in the same college.” The question-and-answer session after Bernardo’s talk made it apparent that attendees had a fresh interest in data innovation through technology, and a renewed awareness to keep the “One Health” mindset for any type of research.

Dr. Bernardo giving the keynote address

## Symposium student highlights

Tabilas and Pennington win poster awards

Congratulations to Erica Lachenauer, a combined DVM and PhD from the Stover lab, for winning best oral presentation. Erica spoke about her mother sparking her interest in infant health and how she is working to ensure no baby is born with spinal defects. In addition, congratulations to Matthew Pennington, a fifth year from the Van De Walle lab, for winning the Best Poster presentation, Yun Ha Hur, a second year from the Cerione lab, for winning Runner-up for Best Poster Presentation, and Cybelle Tabilas, a second year from the Rudd lab, for winning Fan Favorite Poster Presentation!

*-Cybelle Tabilas, second year graduate student in Immunology and Infectious Diseases*

## Steve Kraus Promoted to Senior Lecturer

Since joining the College of Veterinary Medicine in 2010 as head farrier, Steve Kraus has shared his passion with countless clients, students and faculty, as well as continued to advance Cornell's farrier program.

Recently promoted to Senior Lecturer, Kraus is truly in a league all his own. He is one of only a few farriers in the country who also holds a faculty position and is often recognized by peers and faculty for being technically outstanding as well as having a drive to discover new techniques.

A member of the International Farrier Hall of Fame since 2016, Kraus provides outstanding farrier services for clientele in conjunction with managing the operations of the farriery. In addition, he teaches equine-oriented veterinary students in elective courses, organizes an annual farrier conference, and has started a new course for the veterinary students - Farrier Skills for Veterinarians (VTMED 6637) which allows for increased participation.

He is also a leader outside of Cornell having authored a number of articles published in the American Farriers Journal, The Horse Journal and The Professional Farrier. He also wrote a chapter on farrier hoof support/management, and co-authored a chapter on orthotics, prosthetics and splints in the textbook Farm Animal Surgery.

### CVM Class Expansion Construction Update #32 - September 1, 2017

*Atrium Ceiling View*

### Final Regular Monthly Update

#### Construction General Update

- The Class Expansion construction project is near completion and spaces will begin opening September 11, 2017.
- The new Tower Road VRT TCAT bus stop is now open for use.
- The VRT entrance is now open for access & egress.
- The ECRF entrance will no longer be available for public access starting **September 1, 2017**.
- The new CVM Tower Road formal entrance and plaza will open tentatively, on October 1, 2017.
- The new bike racks located under the VRT covered entrance are available for use. The racks along the new Poisonous Plant garden parking lot will be available starting September 11, 2017.
- The new service drive and parking lot adjacent to Clinical Pathology will open September 11, 2017. CU Transportation will post signage soon.

- The new Library is scheduled to open fully September 11, 2017.
- The new atrium (named Takoda's Run Atrium in honor of a donor contribution) will open on September 11, 2017.
- The two 150 Seat Lecture Halls and two 60 seat flat classrooms are scheduled to open for use between September 11-18, 2017.
- Scheduling for use of all new lecture halls, class rooms and Atrium will be done at <http://students.vet.cornell.edu/?pg=rs> or through Kate Davenport in Student Services [klw226@cornell.edu](mailto:klw226@cornell.edu).
- All new circulation corridors will open on September 11, 2017.
- The new interior pedestrian courtyard will open for use on September 11, 2017.
- The new Poisonous Plants Garden is scheduled to open September 11, 2017.
- The new Cafeteria will be open for full business beginning September 18, 2017. The Gallery Food and coffee Kiosk will remain open until then. Normal hours of operation will be 7:30am – 5:00pm, M-F, with cooking operations shutting down at 2:00pm daily. Menus and catering options will be shared soon.
- The Gallery food and coffee Kiosk will be permanently closed, starting September 18, 2017. Vending machines will remain in their current locations at this time.
- The new pet walk will open tentatively, in October 2017 pending status of the grass growth. The temporary pet walk located in front of the VMC will close immediately following the opening of the new pet walk.
- Occupancy of the new and vacated spaces will take place from mid-September to late December pending furniture deliveries and minor renovations of the existing spaces to accommodate those relocation efforts. Attached is a map referencing new locations for the Dean's Office, Educational Technologies Group, Veterinary Library, Alumni Affairs and Development, Masters of Public Health, Communications and Marketing, DVM Student Services, Modular Resource Center, Research and Graduate Education, Budget Office, Continuing Education and other areas.

## Schurman Hall Roof

- The roof replacement is complete but miscellaneous brick façade and trim repairs continue.

## VRT

- Curtain wall is 99% completed. There are a few glass panels that will be replaced in the next couple weeks. New blinds have been ordered & will be installed in the west end offices.
- Levels 6 and 7 renovations are in process. It's anticipated that Level 7 will be completed by Fall 2017 and Level 6 by late Winter 2017.

## Community Practice Service Building

- Foundations, underground utilities and concrete floors are complete.
- Wall and roof framing will begin soon.
- Anticipated completion is May 2018.

## Other CVM Projects

- Construction of a new Teaching Dairy Barn Manure/Sand Separation system is in process and will be completed by October 2017.

**Questions or Concerns** – Please call the CVM Facilities Office @ (607) 253-4455 or (607) 253-3725 or e-mail [cvmexpansion@cornell.edu](mailto:cvmexpansion@cornell.edu) or [wad2@cornell.edu](mailto:wad2@cornell.edu).

## CVM Human Resources News

### Workday Time Tracking - Coming Early 2018

The university will roll out a new time-and-attendance system in early 2018 to replace Kronos - the system currently used. The new Workday Time Tracking (WDTT) time and attendance system is part of the larger Workday system that manages a variety of employee information, such as benefit elections, pay slips, tax information, exempt employees' time off and internal job postings. As part of this effort, all Kronos time clocks will be replaced by Accu-Time Systems (ATS) time clocks. The WDTT system has a familiar look and feel that aligns with the Workday views employees see during onboarding, performance reviews and benefits open enrollment.

### Upgrades to our Mothers' Rooms at CVM

We have recently completed several upgrades to our four existing Mothers' rooms here at CVM. This was made possible by a grant from the President's Council for Cornell Women, Cornell Human Resources, the Graduate School, and Infrastructure Properties and Planning. These combined funds "matched" the contributions made by our college to improve the conditions of the current Mothers' rooms. Upgrades included lighting, tables, chairs, artwork, mirrors, sound machines, etc. Cornell currently has 38 designated spaces across campus ([Mothers Rooms Locations](https://blogs.cornell.edu/mothersrooms/) (<https://blogs.cornell.edu/mothersrooms/>)) and our four can be found below.

- Schurman Hall (<https://blogs.cornell.edu/mothersrooms/schurman-hall/>)
- NYS Veterinary Diagnostic Laboratory (<https://blogs.cornell.edu/mothersrooms/veterinary-diagnostic-lab/>)
- Veterinary Medical Center (<https://blogs.cornell.edu/mothersrooms/veterinary-medical-center/>)
- Veterinary Research Tower (<https://blogs.cornell.edu/mothersrooms/veterinary-research-building/>)

### 6. Add as much information as you can in the top set of fields that appear. A couple of hints about these fields are below:

**Name:** Keep the name brief. Also, if your event will occur over several days, indicate those days in the name. For example: NYS Veterinary Conference (Oct 30 - Sept 2).

**Description:** This can be long or short, as appropriate.

**Start Date:** This is a required field and must be filled in. For multi-day events use the Recurs field to specify and then add those dates to the list.

**Photo:** We recommend that you add a photo as it makes the event presentation more interesting. If you add a photo, the best size for the image is 150 pixels wide by 115 pixels high.

7. Filters. This section is **VERY IMPORTANT**. It will associate your event with our College and will specify on which pages of our website the event will be displayed. Follow these instructions carefully.

**Event Type:** click the box and select the type of event

**Department:** This entry will define the departments associated with your event. In order for your event to be included in the data pull which will send your event to the CVM website, you must **ALWAYS** add "College of Veterinary Medicine". (Note: the entries in this list are not fully in alphabetical order, so you will find College of Veterinary Medicine below the list of items beginning with CVM). In addition to always selecting "College of Veterinary Medicine" you can also add a specific department. All department start with "CVM". Make sure to hit enter after each department selected.

**Group:** It is not necessary to fill out this field.

Save Changes

11. Click Save Changes and your event has been added. Please allow 1 to 3 hours for events added to the Cornell events calendar to appear on the CVM site.

## Removing and Event

If you delete an event from the Cornell events calendar page and no longer want it to appear on our website, please notify [vet-webmaster@cornell.edu](mailto:veter-webmaster@cornell.edu) (<mailto:veter-webmaster@cornell.edu>). There is no need to delete past events. They will no longer appear on the calendar once the event date has passed. But they will remain in the system indefinitely.

## Tagging events owned by others

As a localist administrator, you have the ability to edit events owned by others. It is your responsibility to respect others entries and not modify them in any way, other than to tag or filter them so that they may appear on our website.

## Searching

The screenshot displays the Cornell Events Management & Calendaring dashboard. The top navigation bar includes links for SETTINGS, EVENTS, PLACES, CONTENT, and METRICS. The main content area is divided into several sections:

- Statistics:** Five large cards showing key metrics: 533 FUTURE EVENTS, 68% EVENTREACH, 0 PENDING, 468 PLACES, and 13,014 USERS. A sixth card shows 617 COMMENTS & REVIEWS.
- Actions:** Three buttons for 'Public Calendar View', 'Add an Event', and 'Add a Place'.
- Search:** A section with three search bars for 'Events', 'Places', and 'Groups', each with a red search button.
- Localist News:** A list of recent news items, including 'Localist Keeps Growing! Meet Alex', 'Everything Event Pros Need to Know About Facebook Live', 'How to Craft the Perfect Post-Event Survey', and 'Roundup: What Event Marketers Need to Know About SEO'.
- Localist Success Resources:** A section with links to 'Knowledge Base', 'Getting Started', and 'Best Practices', along with a 'Submit a Support Ticket' button.

At the bottom, there is a 'Powered by Localist.' logo and a 'Share Feedback' button.

You can search by events, places or groups. If you leave the text box blank and click on the red looking glass, another window will open where you will have the option to add additional search options. This can be helpful when looking for a specific type of event that you may want to include on our site, like Diversity for example (see below). This makes it easier to identify them and then you can simple select the events you are interested in and modify the tag accordingly.
